Revised: April-17

Candidates for the Bachelor of Science in Engineering in Data Science - B.S.E. in Data Science - must complete the program listed above. This sample schedule is an example of one leading to graduation in eight terms.

### Notes:

C- Rule: Among science, engineering and mathematics courses, a grade of C- or below is considered unsatisfactory.

Credits from a course may only be used to fulfill a single requirement (no double counting).

<sup>1</sup>The requirements for Math 214 can be satisfied by Math 217 as an alternative.

<sup>2</sup>List of approved courses for this requirement can be found through the DS-Eng section of the EECS website.

<sup>3</sup>Advanced DS Technical Electives: 300-level or higher from a pre-approved list of courses found through the DS-Eng section of the EECS website, or with Chief Program Advisor approval prior to taking the course.

<sup>4</sup>Flexible Technical Electives (FTEs): Approved courses at the 200+ level; list can be found through the DS-Eng section of the EECS website.

<sup>5</sup>A maximum of 4 hours of EECS 499 (or other upper-level directed/independent study) may be applied to Flexible Technical Electives. Anything beyond 4 hours will be applied toward the General Electives.

<sup>6</sup>Another approved 400-level technical communications course may be used with Chief Program Advisor approval prior to taking the course.
